Girard Facts

- Initially founded in 1975 by Steve Girard, acquired in 2000 by Vintner Pat Roney.
- Sourcing and blending are the keys to Girard's ability to deliver consistently outstanding Napa Valley flavors at tremendous value to consumers. It allows consumers to have confidence that they will experience a true Napa Valley classic in every Girard bottle they select.
- Girard has access to unparalleled fruit, sourcing from dozens of elite and diverse vineyards. Close relationships with these vineyards and growers ensures consistent supply of high quality fruit.
- In small batches with keen attention to detail, Girard winemaker Glenn Hugo blends the right fruit from the right locations to handcraft stylistically diverse wines of elegance, balance, power and finesse.
 - All of the fruit is inspected and sorted for quality
 - Red wines are cold soaked prior to fermentation
 - Indigenous and select natural, non-GMO proprietary yeast strains are used for fermentation
 - Each lot is fermented and aged separately in order to develop the desired flavors and textures each will bring to the final blend
 - All wines are aged in 100% French oak, except the Zinfandel and Petite Sirah which are aged in FUSION of barrels ~1/3 French, 1/3 American, 1/3 Hungarian oak. The Sauvignon Blanc is all stainless steel fermented and does not undergo malolactic fermentation
- Girard is dedicated to sustainability, including water conservation, CO2 recycling, and running the winery almost exclusively using solar power.
- Winemaker Glenn Hugo continues to receive the highest accolades from all corners of the trade press.
